DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-6, 9-14, 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hjertman et al (US 5679111). Hjertman discloses a device for dosing a liquid preparation comprising a housing 3 having internal and external threads, a piston rod 12, a coupling 7, a dose dial sleeve 2, a drive sleeve 17, and a clutch sleeve 15. See Fig. 1. Hjertman inherently discloses the steps of providing the drive mechanism above. The device may be used to inject a patient with insulin (Col. 3, lines 16-17).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3763

without the risk of spreading disease.

4. Claims 7, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hjertman in view of Slate et al (US 2002/0167499). Claims 7 and 15 differ from Hjertman in calling for the device to be a needle free device. Slate teaches a injection device with a drive mechanism similar to that of Hjertman that is a needle free jet injector that allows the device to be used a large number of times with a large number of patients without the risk of spreading disease (Page 1, paragraph 0003). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Hjertman to be a needle free device as taught by

Response to Arguments

Slate to allow the device to be used a large number of times with a large number of patients

5. Applicant's arguments, see pages 2-3, filed 12/11/06, with respect to the rejection(s) of claim(s) 1-6,9-14,16-19 under Burroughs have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hjertman.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura A. Bouchelle whose telephone number is 571-272-2125. The examiner can normally be reached on Monday-Friday 8-4.

Application/Control Number: 10/790,024

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nicholas Lucchesi can be reached on 517-272-4977. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
